IOT(Internet of thing) Training

Durations:- 45 Days   **Fee:-7,200 only**

1. ## What is the internet of thing?
   Introduction Internet of thing , The value of the ioe , Globally connected, IoT Features, Advantage & Disadvantage, Embedded Devices and System, IoT Ecosystem, IoT Decision Framework

2. ## Element of ioe
   Thing of element , Data as an element , People as an element , Process an element

3. ## Connecting or UN connecting
   Introduction to the iot system , Introduction to configuring thing , Programming, Prototyping your ideas

4. ## Transitioning to the ioe
   The ioe connection, Implementing an ioe solution, Security and the ioe

5. ## Being it all together
   Modeling and ioe solution, Digitally transforming everything, Want to go further

6. ## Architecture & Domains
   Solution Architecture Models, IoT - Energy Domain, IoT - Biometric Domain, Security Camera and Door Unlock System, Smart Home and City, IoT - Smart Agriculture, IoT - Healthcare, IoT - Transportation, Transforming Businesses

7. ## IoT Devices
   Smarts Objects, IoT Devices, Major IoT Boards in Market

8. ## IoT Platforms
   IoT Platform, ThingWorx Platform

9. ## Communication Protocols
   Data Link, Network Layer, Session Layer

Note:
Project Work is Compulsory after the Completion of training Program.
